

# Solvoz Procurement Support

## Solvoz: procurement and technical capacity for all

The Solvoz platform provides procurement support to you and your organisation. Solvoz also helps to find the right suppliers (national or international) so you receive competitive quotations and bids. In addition, Solvoz can help organisations to define technical specifications, as well as provide auditable documentation. Solvoz helps to increase the efficiency, effectiveness and integrity of procurement processes.

Solvoz offers a global and [free-to-use catalogue with expert knowledge](#). The integrated [procurement workflow is offered as a SaaS](#), Subscription as a Service (click links for explainer videos).

## Procurement support consulting & Rates

We offer a range of procurement support consultancies to support your procurement process upon your needs. For example: Market Assessment, Supplier Assessment, Contract Management, Develop Supplier Assessment Tools, Transport or Importation Templates, or Additional Tender Support Services.

## Open-Access consultancy

Solvoz (social enterprise) works with the Solvoz Foundation. The Foundation is providing open-access knowledge for programmatic needs, providing technical specifications around products, services and designs, as well as the use of a solution in a certain context. Solvoz provides procurement consultancies. Any consulting work will (as per Solvoz mission) become re-usable and open-access if it could be beneficial for other users. Thereby expanding to available open-access knowledge and guidance to increase procurement capacity for all. An example could be specific assessment tools or supplier questionnaires for specific product types<sup>1</sup>.
